Key Product Risks

Credit Risk

This product is an insurance policy issued by the Company. Premium(s) paid become assets of the Company and as such any benefits payable to you are subject to the credit risk of the Company. The Company's financial strength and solvency will affect its ability to satisfy its financial and contractual obligations. If we are unable to satisfy the financial and contractual obligations of the policy, you may lose your premium paid and benefits.

Inflation Risk

The cost of living in the future is likely to be higher than now, due to inflation. This means that the purchasing power of any Benefit Amount paid in the future may be less than its value today, even if the Company meets all of its contractual obligations.

Failure to Pay Premiums Risk

For your policy to be valid you must abide by your premium payment plan. All premiums, after the first premium, are to be paid by the due date. Where this does not happen, customers are given a 30-day grace period to pay due premiums, beginning on the premium due date. Failure to do so may cause the policy to be terminated.

Premium Adjustment Risk

Premiums will remain unchanged throughout each Premium Payment Term. The amount of premium due is determined by factors including, but not limited to, the Life Assured's age, gender, smoking status and health conditions.

At policy renewal, premium(s) will be adjusted based on the Benefit Amount, Premium Payment Term, Policy Benefit Term, the Life Assured's attained age and applicable premium rates. Premium rates may be affected by factors including claims conditions.

While the policy is in force, renewal is guaranteed until the end of the Policy Benefit Term of the third (3rd) Policy Year.
